

Stronghold 300 Wash Gun Exceptional Performance

WATER SAVING BY 20%
Compared to other low-pressure traditional washgun

TECHNICAL DETAILS

- Max Pressure: 1-50 bar. Safe for use on Medium pressure systems
- Max Temperature: 93°C
- Weight: 0.68kg

This small, compact & lightweight washgun is an excellent, long lasting alternative for clients with both low and medium pressure washdown systems Available in both blue and red to suit factory colour coding schemes. It is usable with temperatures as high as 93°C.

KEY FEATURES

- All wetted parts constructed of stainless steel
- Insulated air gap in handle - stays cool even using hot water
- 2 flow rates available:
Standard flow (water saving compared to regular water guns)
High flow (when a higher flow of water is required)
- Precise fully adjustable spray patterns for effective cleaning
- Trigger lock - can be removed if required
- Low force, easy hold trigger - reduces user fatigue and strain when used for long periods of time
- Tough trigger guard to prevent damage to trigger
- Impact resistant case and trigger guard to cope with the rigours of the food processing industry
